DETAILED ACTION

1. Applicant's amendment of claims 2-10 and cancellation of claims 11-13 filed 13 November 2001 is acknowledged. Claims 1-10 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a perfusion preparation.

Group II, claim(s) 7-8, drawn to a method of making a perfusion preparation.

Group III, claim(s) 9, drawn to a method of preparing an organ.

Group IV, claim(s) 10, drawn to a method of treatment.

1. Upon thorough consideration of the claims, the examiner has determined that a lack of unity of invention exists, as defined in Rule 13.

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. Annex B, Part 1(b), indicates that "special technical features" means those technical features which as a whole define a contribution over the prior art. The inventions listed as Groups I-IV are directed to a solution comprising a soluble

peptide capable of interacting with the cellular membranes of exposed organs and method of making and using such solution, and thus share this special technical feature. This common special technical feature is not a contribution over the prior art as it is taught in WO 9802454 A2 or WO 9839433 A1 (see IDS). Thus the invention of Groups I-IV lack unity of invention.

Advisory Information

2. A telephone call was made to John Isacson on October 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheridan K Snedden whose telephone number is (703) 305-4843. The examiner can normally be reached on Monday - Friday, 8:30 AM to 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on (703) 308-2923. The fax phone number for regular
